Subject: Rollout of EOS Platform - Version 2.2.0

Notice to all Members,

Subject: Rollout of the EOS Platform – Version 2.2.0

With reference to TECH-2014-017 dated May 13, 2014, the Exchange shall further enhance its EOS platform (Version 2.2.0) which includes Trade Give-ups, full Multi-Currency capabilities, enhanced Collateral Management and SPAN based margining for Hedge and Speculative accounts. The upgrade to version 2.2.0 is on **Friday, November 07, 2014.**

On the day of the upgrade, EOS-Trader will update to the latest version automatically using the auto-update functionality, alternatively the users may also download and install the new version to access the upgraded trading platform. The FTP details and EOS Trader installation password will be emailed separately. EOS-Clear users would need to reset their perspective after login.

For the benefit of Members and to get acquainted with the Version 2.2.0, the Exchange shall conduct a Mock Trading Session on **Saturday, November 01, 2014**.

Participation by Members is highly recommended in order to get familiar with the new features of the EOS platform.

Members using FIX interface (PORTS users) are requested to take this opportunity to verify the integrity of their respective Order Management System with this upgraded EOS platform.

Members may please note that trades executed during Mock Trading Session are not merged with their actual positions and **WILL NOT** have any financial implications.

The Mock Trading Session details are given below:

Particulars	Timings (Dubai Time-GMT+4)
Mock Trading Session	Saturday, November 01, 2014
Timings during Mock Trading Session	
Login Period	09:00 to 10:00 Hours
Continuous Mock Trading	10:00 to 14:00 Hours

Procedures to be followed during the Mock Trading Session

Download of EOS Trader Version 2.2.0

A new version of the EOS-Trader application shall be used for this Mock Trading.

Participating Members are requested to download the EOS-Trader for Mock from the FTP Server as per the details below and install it to their respective workstations as a preparation for the Mock Trading Session in advance.

It is also to be noted that software setup i.e. ZIP Files are password protected and users need to have necessary password to unzip / install the software folder in their workstations.

The required password will be provided to Members by our DGCX Support team separately by E-mail.

Details of FTP Server to Download EOS-Trader Application

FTP Link: **ftp://eosftp.dgcx.ae**
User ID: **eosftp**
Password: **eos1234**

FTP Path: **ftp://eosftp.dgcx.ae/Common/MOCKSetup/**

Installation Basics

EOS-Trader
- Login to FTP Server and download the **Self Extracting Zip file containing** EOS-Trader application.
- Extract the application in the local directory without changing the folder name.
- Upon successful installation, it will create a separate shortcut on the desktop named **EOS-Trader Mock -2.2.0-32** bit or **EOS-Trader Mock-2.2.0-64** bit depending upon the exe installed.
- EOS-Trader users can access upgraded EOS Trading Platform via existing SSL VPN (Internet) or using the Local/Global MPLS link which are already in place. To access EOS-Trader via SSL VPN the VPN Client software needs to be preinstalled and connected.

Subject: Rollout of EOS Platform - Version 2.2.0

- The SSL VPN Client software can also be downloaded from the above FTP Server, if require.
- The login credential for the EOS Traders and VPN will remain same as existing production (Live) access.

EOS-Clear

- EOS Clear is a web based application and therefore no separate upgrade is required.
- Users need to reset the perspective on EOS Clear after login to access the full functionality. Go to Window - Reset perspective
- EOS Clear can be accessed via the existing SSL VPN (Internet) or Local/Global MPLS link
- To access EOS Clear via SSL VPN the VPN Client software needs to be pre-installed and connected.
- The URL link to access EOS Clear along with login credential will remain same as existing production (Live) environment.

PORTS (FIX) / DROP Copy and EMAPI Users

- FIX/Drop Copy and EMAPI Gateways can be accessed by the Members either via IPSec tunnel (Internet) or on the existing Local/Global MPLS link which are used for the Live Trading as on date.
- ***To access Market Data, EMAPI users need to recompile their application. Applications, which are not recompiled for version 2.2, may not be able to connect to the upgraded EMAPI Gateways.***

COMMON SUPPORT DOCUMENTS

- All documents related to EOS technology platform upgrade along with help files and back-office formats including the ones, which were shared earlier, can be found in COMMON folder on the FTP Server.

LOGIN PROCEDURE

- There is no change in the login procedure. Members can use their existing Live User ID and corresponding passwords to log-in for the Mock Trading using the new version of EOS Trader.

POST TRADING ACTIVITIES

- Exchange will generate back office reports after the Mock Trading which shall be available in the Live FTP Server (under Mock folder). Members may download these reports from the FTP Server for verification purposes after 15:00 Hours. To reiterate, the trades executed in Mock Trading Sessions will not involve any financial obligation for pay-in and pay-out.
